SASH, DOORS, MOULDINGS, MILLWORK

ELMER & MOODY CO., Seattle

2225-7-9 & 2301-3-5 First Avenue

HOW TO ORDER

Write our your order on the Special Millwork Order Blank enclosed with this catalog, or on a plain sheet of paper. Be sure to give the numbers or names shown in catalog; also size and quantity required. IT IS A UNIVERSAL RULE IN ORDERING MILLWORK TO GIVE THE WIDTH FIRST, THEN THE HEIGHT, AND THEN THE THICKNESS.

If your postoffice is different from your shipping point, give us the name of both.

WINDOWS AND SASH

The term Sash indicates a single piece. Window, two pieces, a lower and upper sash. In ordering windows give the size and number of lights. In ordering sash give the size of opening to be filled, preceded by the abbreviation OSM, meaning outside measure. If more than one light is wanted, send a rough sketch showing the arrangement of lights.

DOORS

In ordering doors not shown in the catalog it is advisable to send a sketch showing arrangement of panels, size of glass, etc., as well as the size.

FREIGHT

All prices in this catalog are F. O. B. Seattle. We will be glad to quote delivered prices to your station on any lists of material that you send us.

TERMS

Cash in full with order: If you care to send cash in full with the order, we will allow a cash discount of 2%. Take this off when sending order.

Cash on Delivery: If you do not care to send all cash with the order, we will ship it on receipt of 25% of the amount of the bill. In this case we draw a draft for the balance with Bill of Lading attached and send it to your Bank.

Prepay Stations: If your station is a prepay station, it will be necessary to send enough money with the order to pay for the material and also the freight. We will refund any excess sent.

DAMAGE IN SHIPMENT

Always inspect your goods carefully before taking them from the station. If any bundles are missing or are broken or scratched, have the agent make a notation on the freight bill of the damaged or missing article. If you will then send us the freight bill, we will pay the damage or replace the goods.

MADE TO ORDER GOODS

We are prepared to furnish special millwork of all kinds. Remember, however, that you can save time and money by ordering the stock items shown in this catalog. Odd sizes and special millwork must be made to order and will take from two to three weeks' time. If your order contains both stock items and made-to-order items, please state if you want the stock items sent at once or whether the entire order shall be held, awaiting the making of special items.

Philippine Mahogany Doors

LIGHT RED, RIBBON FIGURED

STYLES IN FRONT DOORS

As the front door gives the visitor the first impression of the home, great care should be used in the style selected. It should suit the type of house in which it is used and if possible portray some of the individual characteristics of the home.

The designs shown on this and the following pages are taken partially from the old conventional types of architecture and partially from the more modern.

MODERN

MODERN

This is a typically modern Front Door. It has an Old Iron Finish Metal Wicket with a Knocker and on the inside a smaller metal door that can be opened. On the outside are four "V" Grooves. Made either in Ribbon Figured Philippine Mahogany or Vertical Grain Fir.

Size of Door		Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8"	1¾"	$22.40	$22.00
3'0"x7'0"	1¾"	23.25	22.80
3'6"x7'0"	1¾"	26.20	25.70

CENTENNIAL

CENTENNIAL

This is another type of Modern Front Door. It has a small Chrome Wicket for observation to the outside and the exterior has five herringbone "V" Grooves. Made either in Ribbon Figured Philippine Mahogany or Vertical Grain Fir.

Size of Door		Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8"	1¾"	$25.40	$25.00
3'0"x7'0"	1¾"	26.25	25.80
3'6"x7'0"	1¾"	29.20	28.70

CASTELLA

CASTELLA
PHILIPPINE MAHOGANY FLUSH DOOR

Outside has V Grooves, inside veneered plain ribbon figured. This door has a Metal Wicket with a knocker, Old Iron Finish. On the inside there is a small Metal door that can be opened. Typically Spanish.

Size of Door		Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8"	1¾"	$23.13	$22.75
3'0"x7'0"	1¾"	23.98	23.58
3'6"x7'0"	1¾"	26.94	24.46

NAPLES

NAPLES
PHILIPPINE MAHOGANY FLUSH DOOR

The outside of this door has two Fancy Moulded Grooves about one inch wide. The light is covered with a Metal Grille, finish Old Iron. Back of this Grille is a wood sash that can be opened.

Size of Door		Philippine Mahogany Per Door	Vertical Grain Fir Per Door
3'0"x6'8"	1¾"	$23.90	$23.50
3'0"x7'0"	1¾"	24.75	24.30
3'6"x7'0"	1¾"	27.70	27.20

Slideway Screened Casement Sash

THE MODERN METHOD OF SCREENING CASEMENTS

Screens slide to one side when not in use. Can be moved with one finger.

Patented December Eleventh, 1934
No. 1983846

We are now able to offer a successful method of screening a swing out casement sash. The screen slides on a metal track into a pocket and when not in use is entirely concealed. Usually this pocket is on the right hand side of the sash looking from the inside, but it can be furnished on the left hand when required.

This unit is furnished set up complete, ready to install. The frame is made in two sections, an outer section which is set in place from the outside just like an ordinary sash frame and an inner section which is set in place from the inside. These two sections are fastened together by long screws which are included and for which the holes are bored and screws fitted.

The sash are fitted to the frames and are prepared for casement sash hardware shown on this page. This hardware is not included in the prices quoted. The screen is screened with bronze wire and has sheaves at the bottom to slide easily. Moulded fir trim is included but Philippine Mahogany can be furnished at slightly higher prices.

The sizes listed are standard sizes, but other sizes can be furnished. The mullion sash have one sash screened, usually the right hand. We can screen both if desired. We can also furnish triple sash with one or two sash screened.

Frames with Plain Casing, Back Band or for Brick Veneer. 3½ Inch Moulded Fir Trim Included.

Single Casements — **Screens Slide to Right**

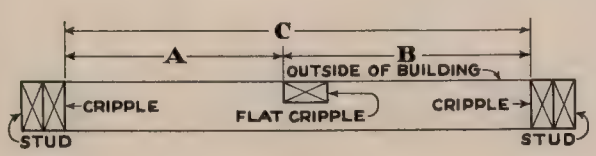
CASEMENT SASH HARWARE

This hardware takes the place of butts and adjusters, completely concealed when applied by rabbeting top and bottom of sash. It allows the sash to open at right angles so both sides of the glass may be washed from the inside.

Wrought steel, sheridized finish, 10″ long for sash up to 30″ wide.

Per Set (for one sash).....$0.75



FRAMING SPECIFICATIONS

To frame rough opening for Slideway Screened Casements

Width

For Single Sash: A—Width of sash plus three inches. B—Width of sash.

For Twin Sash, With One Screen: A—Combined width of two sash plus four inches. B—Width of one sash.

For Twin Sash, With Two Screens: A—Combined width of two sash plus four inches. B—Width of one sash, on each side of A.

Height—Height of sash plus four inches.

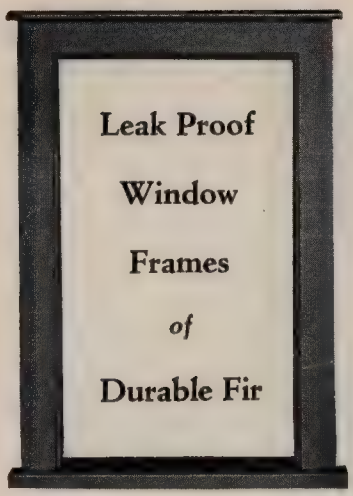
Exterior Window Frames

FOR FRAME BUILDING WITH 2x4 STUDDING
Jambs Including Blind Stop, 5¼ Inches Wide



Made of soft yellow fir, accurately machined and shipped in one bundle ready to assemble. All window frames are made with removable pockets and jamb-proof pulleys. The sills have a steeper pitch than usual with a shoulder to keep wind and rain from driving under stool and another for storm sash or screen to set against. Sills are dadoed to receive pulley stiles and when frames are sent out set up white lead is used in all joints.

Note: All frames have 5¼" jambs. For special width jambs see extras on opposite page.

TO DETERMINE ROUGH OPENING REQUIRED

Width—Single windows add 6 inches to the width of window.
Twin windows, take the combined width of two windows and add 11½ inches.
Triple windows, take the combined width of three windows and add 17 inches.
Height—Add 4 inches to height of window.

Exterior Sash and Door Frames

For Frame Building with 2x4 Studding
Jambs 5¼ Inches Wide

Made of soft yellow fir, accurately machined and shipped in one bundle ready to assemble. Sash frames, unless otherwise ordered, are made for swing out sash, but they can be furnished for stationary or swing in sash at no extra cost. The jambs are double rabbeted with a stop on the inside for the sash to set against. If hardwood is used for interior trim this stop can be furnished to match the other trim. The sill has a steeper pitch than usual and has a shoulder to keep wind and rain from driving under stool. Frames can also be made to special details. Write for prices.

Ribbon Grain Philippine Mahogany Trim

DESIGNS CARRIED IN STOCK

Let us give you a quotation on Philippine Mahogany doors and trim for the main rooms of your house. The slight additional cost will surprise you.

Philippine Mahogany, which is not only beautiful and distinctive, but also low in original cost and upkeep, is filling a long felt need for woodwork in the home. A good finish on this wood will last for years with occasional cleaning and polishing. Considering this quality, the difference in cost between painted woodwork and Philippine Mahogany is very little.

The soft ribbon figure grain with its ever changing shadows due to changes in direction of light, makes it a distinctive wood which has unusual life and character. We are prepared to make any item of millwork which you may need out of this wood.

Turn to the first four pages of this book for designs and prices of Philippine Mahogany doors to go with this trim.

Write for Special Price Sheet

EXPLANATION OF GRADES

Clear or Best Grade, for exposed floors, living rooms, dining room, ballroom, etc.

Select, next grade below first, contains only minor defects. Excellent for bedrooms, halls, etc.

INFORMATION REGARDING HARDWOOD FLOOR

Feet	Size	How Measure	Will Cover Space of	Percentage to be Added	Quantity Nails Req.	Kind of Nails	Weight per 100 Feet
100	⅜ x 2	1 x 2½	80 Ft.	25%	1 Lb.	3d Finishing	100 Lbs.
100	¾ x 2¼	1 x 3	75 Ft.	33⅓%	4 Lbs.	8d Cut Casing	200 Lbs.

HOW TO ORDER HARDWOOD FLOORING

⅜" x 2" Flooring is counted 2½" wide, ¾" x 2¼" Flooring is counted 3" wide to allow for Tongue and Groove.

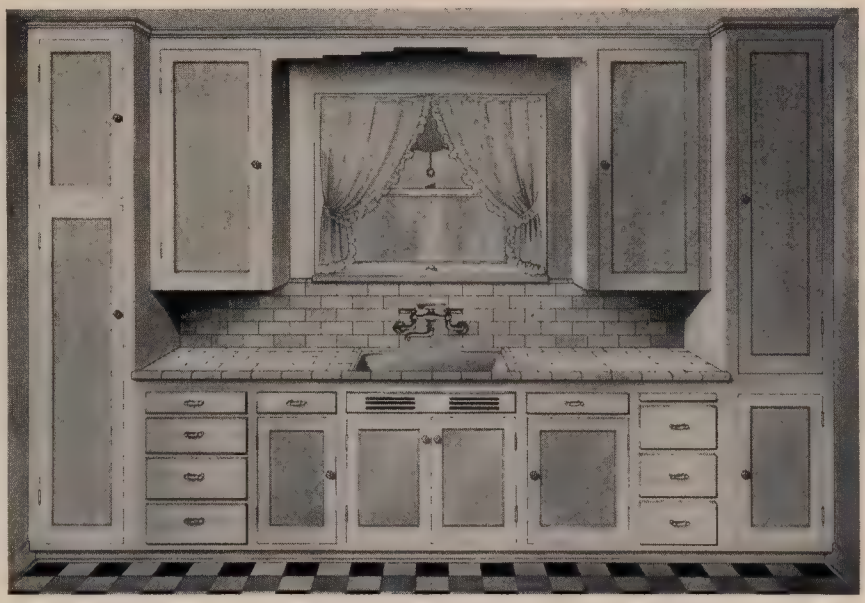
Multiply the width by the length of the room to find the number of square feet to be covered. If ⅜" x 2" flooring is to be used add one-quarter extra and if ¾" x 2¼" is to be used, add one-third extra to allow for Tongue and Groove. It is well also to add about one percent to the amount needed to make up for short ends, etc.

Tennessee Cedar Closet Lining

For use in old or new houses. This is the same lumber that is used in making cedar chests for protection against moths. It is tongue and grooved, and end matched and can be easily blind nailed over old plaster walls. The size is ⅜" x 2" and it comes in a paper carton containing forty square feet, enough to cover thirty-two square feet of wall area.

Per Carton of Forty Feet.....**$4.80**

Kitchen Cabinets and Ironing Boards



KITCHEN CABINETS

We can furnish Kitchen Cabinets of every kind, either to plans and specifications or if you will send us a pencil sketch and measurements we will draw up a design to suit your ideas. Measurements usually required are as follows:

A. Total width between plastered walls.

B. Width from left hand wall to center of sink.

C. Width from right hand wall to center of sink.

D. Size of sink.

E. Height of sink, standard height is 35 inches.

F. Width from left hand wall to outside edge of window casing.

H. Height from top of finished floor to ceiling plaster.

IRONING BOARD NO. 83

To set in wall, between studs. Opening required 1'2"x6'8".

Per Board $4.50
Add for casing..... .85

HOWARD ADJUSTABLE IRONING BOARD NO. 85

To hang on wall. Board adjustable to any height desired. No opening in wall is necessary.

Complete with Hardware..... $6.50

HOWARD ADJUSTABLE IRONING BOARD NO. 86

To set in wall, opening 14" wide. Board sets 10" above floor. Board Adjustable 20" to 36" above floor. Sleeve Board included.

Per Board $6.00
Add for Casing..... .85

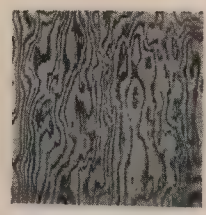
Flush Cupboard Doors



Flush Cupboard Doors present a smooth, flat face for painting or staining. They are made with a framed lumber core, crossbanded, and a sheet of Rotary Cut Flat Grain is applied to each side making a five-ply door. The core is ventilated to allow for expansion. They can be cut down as much as four inches either in width or height. All three quarters of an inch thick.

Stairs

No. 9 No. 8

Upon entering a home the stairway is usually the most conspicuous item of millwork in the entrance hall. As it is in such an impressive position, it deserves careful planning and building. Stair parts should be simple in design and of proper proportions.

The design shown here is carefully worked out to suit several types of homes, and is delicate enough in form for either a short exposed flight or for a full length open stairway. The bow face riser of the starting step terminating in a small curved return, gives beauty and an inviting appearance to the stairs. The small spiral cap on the turned newel, with a graceful easing and slight turnout, add much to its attractiveness.

NEWELS

	Fir	Philippine Mahogany
Landing Newel No. 8	$5.00	$6.50
Starting Newel No. 9	6.00	8.00

PRICES OF PARTS FOR THE STAIRS PICTURED ABOVE

Bow Face Starter Step and Riser		
Oak Tread, Fir Riser	Each	$15.00
Oak Tread, Philippine Riser	Each	16.00
Turned Newel		
Clear Fir	Each	4.75
Philippine	Each	6.50
Small Spiral Cap with Easement		
Clear Fir	Each	16.00
Philippine	Each	18.50

For prices of Treads, Risers, String Boards and Balusters, see opposite page. For Philippine Mahogany Rail, see Page 33.

In ordering any of these parts we will need the rise and run of the stairs and the width from the wall to the face of the plaster on the open side.

Sound Two Side Panels have a sound face on both sides, but may show some discoloration and limited sound defects. They are suitable for all ordinary uses and are particularly adapted for shop use. We can furnish Plywood in Good One Side at One Cent per square foot, or Good Two Sides at Two Cents per square foot advance over the above prices.

BATTENS

Moulded

⅜"x1⅜" Per 100 Lin. Ft. $1.10

Plain

⅛"x1⅜" Per 100 Lin. Ft. 1.00

Plywood Wallboard

Full ¼" Thick Laminated 3 Ply

Plywood Wallboard is the ideal material for finishing ceilings and walls of homes, Summer Cottages, Attics and Basements. It is also widely used for lining Garages and Farm Buildings of all kinds, especially Poultry Houses and Milk houses. Beautiful effects can be obtained by using it to panel the walls of Stores, Restaurants, Offices and other Public Buildings.

Insulation Wallboard

KEEP YOUR HOME COMFORTABLE

Insulation Wallboard, due to its construction, has a high insulating value, keeping the home cool in summer and warm in winter. In homes heated by furnaces it has been demonstrated that adequate insulation of walls, floors and ceilings reduces fuel expense by one-third.

INSULATION WALLBOARD

	Per M
½ Inch Standard Insulation In Sheets 4'x6'—7'—8'—10' and 12'	$50.00
¾ Inch Standard Insulation In Sheets 4'x6'—7'—8'—10' and 12'	63.00
1 Inch Standard Insulation In Sheets 4'x6'—7'—8'—10' and 12'	70.00
½ Inch Insulating Tile Board Sizes 12"x12" Beveled Edges	60.00
Sizes 16"x32" Beveled Edges	53.00
½ Inch Insulating Plank 8"—10"—12"—16" wide, 8' long, Beveled Edges	60.00
½ Inch Insulating Lath Size 18"x48". Used wherever a plaster base is required. Shiplap joints	50.00

In addition to the above sizes, we make screens to fit any size windows or sash, at 14 cents per square foot for galvanized wire, with a minimum charge of $1.00 per screen, and 20 cents per square foot for bronze wire with a minimum charge of $1.50 per screen.

Screens are made ¾-inch and 1⅛-inch thick. Be sure and state which thickness is wanted. In ordering always give the width first, then the height and thickness.

We are also prepared to furnish special size screen doors on short notice.

FOR SCREEN DOOR AND WINDOW HARDWARE, SEE PAGES 42 to 45

ALWAYS GIVE THE WIDTH FIRST

Order Blank of the Elmer & Moody Company

Seattle, Washington

It is our desire to satisfy you fully, and in order to do so, we must send you the exact items that you order. This is only possible if we thoroughly understand your requirements. As there are so many little details that are important in ordering millwork, we are offering a few suggestions that we hope will be of some help in ordering.

SHIPPING INSTRUCTIONS

Please fill in the order blank clearly with your name, post office, shipping point if different from post office, and the amount of money you enclose.

FRAMES

The Frames shown in our catalog all have 5¼-inch Jambs, in the case of Window Frames this is the combined width of the pulley stile and blind stop. This is the width necessary for 2x4 studs, ¾-inch outside sheathing and ¾-inch plaster. If different size studs or plaster board is used give us the thickness of your wall from the outside of sheathing to inside face of plaster.

Be sure to give the type of frame wanted, ordering by name and number from the design book. If something special is wanted, send detail.

In ordering frames for double hung two-light windows, give the glass size of both top and bottom sash if different.

In ordering Sash Frames, give the outside measure of the sash in feet and inches (2 feet 4 inches by 4 feet 6 inches) and state whether the sash is stationary or swings in or out.

Always give the width first, the height next and the thickness of the article, that is to go in the Frame.

WINDOWS AND SASH

The term Sash indicates a single piece. Window, two pieces, a lower and upper sash. In ordering windows give the size and number of lights. In ordering sash give the size of opening to be filled, preceded by the abbreviation OSM, meaning outside measure. If more than one light is wanted, send a rough sketch showing the arrangement of lights.

DOORS

In ordering doors not shown in the catalog it is advisable to send a sketch showing arrangement of panels, size of glass, etc., as well as the size.

OTHER MILLWORK

For other millwork such as stairs, cabinets, etc., you will find instructions in the design book.

If there is anything you do not understand or any information you want, write us; we will be glad to explain it to you.
